Pursuant to 37 CFR §1.321(b), and to obviate a double patenting rejection, the assignee identified above hereby waives and disclaims the terminal portion of the term of the entire patent to be granted upon the present application subsequent to the expiration date of the patent to be granted on U.S. Reissue Patent Application No. 10/002,947 of the same original Patent No. 5,978,125, whereby the patent granted on this application and the patent to be granted on U.S. Reissue Patent Application No. 10/002,947 will expire on the same day, provided that any patent granted on the present application shall be enforceable only for and during such period that it is commonly owned with the patent to be granted on U.S. Reissue Patent Application No. 10/002,947.

The assignee identified above does not disclaim any terminal part of any patent granted on the present application prior to the expiration date of the full statutory term of the patent to be granted on U.S. Reissue Patent Application No. 10/002,947 in the event that it later: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid, is statutorily disclaimed in whole or terminally disclaimed under 37 CFR §1.321(a), has all claims cancelled by a reexamination certificate, or is otherwise terminated prior to expiration of its statutory term, except for the separation of legal title as stated above. Assignee herein does not disclaim or otherwise affect any part of the patent to be granted on U.S. Reissue Patent Application No. 10/002,947.

This disclaimer runs with any patent granted on the present application and is binding upon the grantee, its successors or assigns.
